How to distinguish the fan fails and overheat of BPU-230SATA?

If the fan fails, the fan LED will stay on red, otherwise could be the temperature. If the problem due to overheat, the fan LED will be on green.

And you could also tell by the beeping pattern. 4 consecutive short beeps indicate the temperature issue; continuous beeps indicate the fan failure.

BPU-230SATA, BPU-340SATA and BPU-350SATA are the same
