

How to insert HDD trays into BPU-124DE-SS

1. A quarter portion of HDD tray has a flat surface on both side toward the rear.

2. This portion of tray needs to be against the tracks inside the housing before sliding tray in.

3. In order to do this, use your thumb to push down hdd tray to have tray sit on top of the tracks before sliding in.

4. Slide in hdd tray evenly.
