No HDD	Blue light always on	N/A
HDD failed	Blue light always on	N/A
Data access	Blue light always on	Blue light flashing
HDD idle	Blue light always on	Blue light always on

2

### Hardware Installation

Please install RAGE40-TB3 as the following instruction.

**Note:** Please avoid using hard disk drives from different manufacturers or different models from the same manufacturer as this may impact system performance.

1. When you open the package, please immediately check the product and included parts for any damage or missing parts. If there is a problem with the product or included parts please contact your supplier immediately.
2. Place the device on a flat, even surface. Make sure that the cooling fan is not blocked and there is sufficient surrounding space for cooling. (Keep away from water or other environments that may cause product damage).
3. Please insert the pin included with the parts pack into the keyhole to release the HDD enclosure handle and remove the HDD enclosure.
4. Place the hard disk in the HDD enclosure and secure it in place with the included screws; this will prevent damage to the hard disk from external vibration.
5. Once the hard disk is installed, slide the enclosure into the system and close the handle.
6. Select the appropriate cable from the accessories pack depending on the interface. Connect the RAGE40-TB3 backplate connection port to the corresponding port on the computer.
7. Connect the AC Power cable to the RAGE40-TB3. Plug the connector into the power socket then start the system.
8. Your operating system will automatically detect available capacity once the device finishes booting. Once the device has been detected, please follow instructions given by the operating system and format the system. Once the hard disk has been formatted, the RAGE40-TB3 system can be used.
9. If the computer is unable to detect the system, please install the drivers from official website ([www.istarusa.com](http://www.istarusa.com))

3

### Important Notice

1. Please make sure that the hard drives are free from bad blocks or defects prior to installation in order to avoid system crashes or data loss.
2. Whenever turning off or unplugging the RAGE40-TB3 from your computer system becomes necessary, always remember to safely remove it from your operating system first.
3. When the RAGE40-TB3 is connected to the computer system, it's prohibited to remove, insert or swap the hard drive while data transfer is being performed.
4. If you will be incorporating either software or hardware RAID functionality to operate with the RAGE40-TB3, it is important to understand the RAID level and its component that will be incorporated and the precautions to take as each RAID level and component may function differently and contains various limitations.
5. RAGE40-TB3 will go into sleep mode when Thunderbolt cable is not connected, while fan and LED indication of RAGE40-TB3 will not be functioning until connecting with Thunderbolt cable.
6. When RAGE40-TB3 goes into sleep mode that fan and LED indication of RAGE40-TB3 will not be functioning, until RAGE40-TB3 has been reactivated.
7. If HDD was used for RAID in other devices, please revert the HDD to JBOD mode using original device/software before install in RAGE40-TB3.
8. It is highly recommended for users to back up important data contained within the drives of the RAGE40-TB3 on a regular basis or whenever the user feels necessary to a remote or a separate storage device. ISTARUSA will not be responsible for any lost of data caused during the use of the RAGE40-TB3 or the recovery of the data lost.

Thank you for choosing this iSTARUSA product.
