

Reliable Power Equipment For Tough Environments

ClayPower UPSes & PDUs Feature Top-Notch Quality & After-Sales Service

FOR ANY BUSINESS, the cost of server downtime can be unimaginable. That's why a UPS is a must for systems of almost any size. At the same time, those systems require a quality PDU that can provide a continuous stream of reliable power to stay up and running.

But what do you look for when purchasing power equipment for your data center? Required load, runtime, and redundancy are all important considerations, but it also needs to be offered by a company with a strong history and experts who have knowledge and expertise in helping you find the right products for your data center's needs.

ClayPower is a division of iStarUSA Group, which has a 13-year history of providing superior technology and building strong partnerships with its providers and customers.

One-Stop Shop

By offering a variety of IPC-related products for tough industrial environments, iStarUSA Group's overriding

goal is to provide a one-stop shop for all of a company's needs, says Product Manager Matthew Mak.

equipment while also providing the ability to monitor UPS status through the server with the included software. The UPS

providing lightning and surge protection to your equipment. The modular and multifunctional units come with either a 10- or 12-foot power cord and offer quick and easy installation; smaller units can mount either vertically or horizontally in a cabinet.

The company's line of Surveillance System UPSes and PDUs keep CCTV and DVR/NVR systems up and running during surges and brown-outs. The products feature automatic voltage regulation (AVR) technology for a wide operating range and an optional 12V battery to

extend the backup time.

Reliability, Service

With any product you purchase from iStarUSA Group, you'll benefit from peace of mind before and after the sale, Mak says. "Customer satisfaction and quality control are always our priority, and customers trust our product quality and love our after-sales service."

ClayPower offers a range of industrial UPSes, PDUs, and surveillance UPSes. The online UPSes offer true double-conversion Digital Signal Processor (DSP) technology to provide a clean, high-quality, stable power source to the connected equipment, Mak says.

Clean Power, Monitoring Capabilities

ClayPower UPSes offer several outstanding features. For starters, the UPSes provide clean power to valuable

front LCD display indicates UPS status, load level, backup battery level, and other input/output and battery information. A programmable outlet provides maximum backup time to the most critical equipment.

The UPSes are ready to be used as a standalone tower, Mak says, and are also rack-mountable to any standard server rack. The easy-shift LCD display can be changed for rack or tower mode.

ClayPower PDUs offer between eight and 24 outlets,
